CONTENTS OF VOLUME 25

Number 1

1 A lattice BGK model for advection and anisotropic dispersion equation
X. ZHANG, A.G. BENGOUGH, J.W. CRAWFORD & I.M. YOUNG

9 Two exact solutions for a cylindrical inhomogeneity in a multi-aquifer system
M. BAKKER

19 Transport simulation with stochastic aperture for a single fracture – comparison with a laboratory experiment
E. WENDLAND & T. HIMMELSBACH

33 Dissolution of residual non-aqueous phase liquids in porous media: pore-scale mechanisms and mass transfer rates
N.A. SAHLOUL, M.A. IOANNIDIS & I. CHATZIS

51 Multi-objective optimal design of groundwater remediation systems: application of the niched Pareto genetic algorithm (NPGA)
M. ERICKSON, A. MAYER & J. HORN

67 A discontinuous Galerkin method for two-dimensional flow and transport in shallow water
V. AIZINGER & C. DAWSON

85 Mixed finite element methods and higher-order temporal approximations
M.W. FARTHING, C.E. KEES & C.T. MILLER

103 Transient flowmeter test: semi-analytic crossflow model
Z.J. KABALA & H.K. EL-SAYEGH

123 Conference Diary

Number 2

127 Editorial

129 Application of critical path analysis to fractal porous media: comparison with examples from the Hanford site
A.G. HUNT & G.W. GEE

147 A forward particle tracking Eulerian–Lagrangian Localized Adjoint Method for solution of the contaminant transport equation in three dimensions
P. BINNING & M.A. CELIA

159 Higher order time integration methods for two-phase flow
C.E. KEES & C.T. MILLER

179 Characterization and prediction of runoff dynamics: a nonlinear dynamical view
M.N. ISLAM & B. SIVAKUMAR

191 Approximate similarity solutions to the Boussinesq equation
A.S. TELYAKOVSKIY, G.A. BRAGA & F. FURTADO

195 Non-reflecting boundary flux function for finite volume shallow-water models
B.F. SANDERS

203 Visualization experiments of biodegradation in porous media and calculation of the biodegradation rate
D.V. VAYENAS, E. MICHALOPOULOU, G.N. CONSTANTINIDES, S. PAVLOU & A.C. PAYATAKES

221 Putting aquifers into atmospheric simulation models: an example from the Mill Creek Watershed, northeastern Kansas
J.P. YORK, M. PERSON, W.J. GUTOWSKI & T.C. WINTER

239 Conference Diary

Number 3

243 An efficient parallel-computing method for modeling nonisothermal multiphase flow and multicomponent transport in porous and fractured media
Y.-S. WU, K. ZHANG, C. DING, K. PRUESS, E. ELMROTH & G.S. BODVARSSON

263 Dynamic simulation of the Dead Sea
B.N. ASMAR & P. ERGENZINGER

279 Conformal mapping of groundwater flow fields with internal boundaries
E.I. ANDERSON

293 Transpiration dynamics of an Austrian Pine stand and its forest floor: identifying controlling conditions using artificial neural networks
J.A. VRUGT, W. BOUTEN, S.C. DEKKER & P.A.D. MUSTERS

305 A comparative analysis of rain-gauge and radar techniques for storm kinematics
I.K. TSANIS, M. GAD & N.T. DONALDSON

317 Surface flow model: inverse problems and predictions
L.W. WHITE, B. VIEUX & D. ARMAND

325 The influence of serial correlation on the Mann–Whitney test for detecting a shift in median
S. YUE & C. WANG

335 The saltpool benchmark problem – numerical simulation of saltwater upconing in a porous medium
K. JOHANNSEN, W. KINZELBACH, S. OSWALD & G. WITTUM

349 Conference Diary

Number 4

353 An efficient algorithm for high accuracy particle tracking in finite elements
D. POKRAJAC & R. LAZIC

371 Origin of fractional flow dimension to a partially penetrating well in stratified fractured reservoirs. New results based on the study of synthetic fracture networks
H. JOURDE, S. PISTRE, P. PERROCHET & C. DROGUE

389 Hydraulics of a finite-diameter horizontal well with wellbore storage and skin effect
E. PARK & H. ZHAN

401 Numerical modelling of barotropic tidal dynamics in the strait of Messina
A.A. ANDROSOV, B.A. KAGAN, D.A. ROMANENKOV & N.E. VOLTZINGER

417 Analytical solutions of tidal groundwater flow in coastal two-aquifer system
H. LI & J.J. JIAO

427 Stability and accuracy of finite element schemes for the one-dimensional kinematic wave solution
F.H. JABER & R.H. MOHTAR

439 Effects of chemical reactions on density-dependent fluid flow: on the numerical formulation and the development of instabilities
V. FREEDMAN & M. IBARAKI

455 Solute transport in open channel flows and porous streambeds
F. HABEL, C. MENDOZA & A.C. BAGTZOGLOU

471 Acknowledgements

473 Conference Diary

Number 5

477 Considerations for modeling bacterial-induced changes in hydraulic properties of variably saturated porous media
M.L. ROCKHOLD, R.R. YARWOOD, M.R. NIEMET, P.J. BOTTOMLEY & J.S. SELKER

497 Development and evaluation of a local grid refinement method for block-centered finite-difference groundwater models using shared nodes
S. MEHL, M.C. HILL

513 Stochastic reactive transport in porous media: higher-order closures
B.X. HU, H. HUANG, A.E. HASSAN & J.H. CUSHMAN

533 Numerical simulation of non-isothermal multiphase multicomponent processes in porous media. 1. An efficient solution technique
H. CLASS, R. HELMIG & P. BASTIAN

551 Numerical simulation of non-isothermal multiphase multicomponent processes in porous media. 2. Applications for the injection of steam and air
H. CLASS & R. HELMIG

565 Estimation of water saturation dependence of dispersion in unsaturated porous media: experiments and modelling analysis
G. NÜTZMANN, S. MACIEJEWSKI & K. JOSWIG

577 Analytical solution for tidal propagation in a coupled semi-confined/phreatic coastal aquifer
D.S. JENG, L. LI & D.A. BARRY

585 Letters to the Editors

589 Conference Diary

Number 6

591 Frozen barrier evolution in saturated porous media
A.Y. SHESHUKOV & A.G. EGOROV

601 On boundary conditions in the lattice Boltzmann model for advection and anisotropic dispersion equation
X. ZHANG, J.W. CRAWFORD, A.G. BENGOUGH & I.M. YOUNG

611 Validation of classical density-dependent solute transport theory for stable, high-concentration-gradient brine displacements in coarse and medium sands
S.J. WATSON, D.A. BARRY, R.J. SCHOTTING & S.M. HASSANIZADEH

637 Analytical solutions to a hillslope-storage kinematic wave equation for subsurface flow
P. TROCH, E. VAN LOON & A. HILBERTS

651 Model vs. design sensitivity to the ground-truth problem of rainfall observation
C. YOO, E. HA & S.-C. SHIN

663 Improved numerical evaluation of the radial groundwater flow equation
H.-Y. PENG, H.-D. YEH & S.-Y. YANG

677 Multi-reservoir design using Pontryagin principle
H. MOUSAVI & A.S. RAMAMURTHY

689 Computational modeling of flow and sediment transport and deposition in meandering rivers
M. SHAMS, G. AHMADI & D.H. SMITH

701 Letters to the Editors

703 Conference Diary

Number 7

705 A Krylov finite element approach for multi-species contaminant transport in discretely fractured porous media
K. ZHANG & A.D. WOODBURY

723 Modeling multicomponent NAPL transport in the unsaturated zone with the constituent averaging technique
P. GAGANIS, H.K. KARAPANAGIOTI & V.N. BURGANOS

733 Backward probabilistic model of groundwater contamination in non-uniform and transient flow
R.M. NEUPAUER & J.L. WILSON

747 A Dupuit formulation for flow in layered, anisotropic aquifers
M. BAKKER & K. HEMKER

755 A diffusion limited sorption kinetics model with polydispersed particles of distinct sizes and shapes
H. BAŞAĞAOĞLU, B.J. MCCOY, T.R. GINN, F.J. LOGE & J.P. DIETRICH

773 The successive linear estimator: a revisit
J.A. VARGAS-GUZMÁN & T.-C.J. YEH

783 Prediction of the Dead Sea dynamic behaviour with the Dead Sea–Red Sea Canal
B.N. ASMAR & P. ERGENZINGER

793 Chaotic dynamics in flow through unsaturated fractured media
B. FAYBISHENKO

817 The influence of the pattern of moving rainstorms on overland flow
J.L.M.P. DE LIMA & V.P. SINGH

829 Multi-reservoir design using Pontryagin principle
H. MOUSAVI & A.S. RAMAMURTHY

841 Imbibition of saline solutions into dry and prewetted porous media
N. WEISBROD, M.R. NIEMET & J.S. SELKER

857 Conference Diary

Numbers 8–12

859 Editorial

861 Characterizing flow and transport in fractured geological media: A review
B. BERKOWITZ

885 Asymptotic regimes in unstable miscible displacements in random porous media
Z.M. YANG, Y.C. YORTSOS & D. SALIN

899 Variable-density flow and transport in porous media: approaches and challenges
H.-J.G. DIERSCH & O. KOLDITZ

945 Modelling the fate of oxidisable organic contaminants in groundwater
D.A. BARRY, H. PROMMER, C.T. MILLER, P. ENGESGAARD, A. BRUN & C. ZHENG

985 New modeling paradigms for the sorption of hydrophobic organic chemicals to heterogeneous carbonaceous matter in soils, sediments, and rocks
R.M. ALLEN-KING, P. GRATHWOHL & W.P. BALL

1017 Processes in microbial transport in the natural subsurface
T.R. GINN, B.D. WOOD, K.E. NELSON, T.D. SCHEIBE, E.M. MURPHY & T.P. CLEMENT

1043 A primer on upscaling tools for porous media
J.H. CUSHMAN, L.S. BENNETHUM & B.X. HU

1069 Detailed physics, predictive capabilities and macroscopic consequences for pore-network models of multiphase flow
M.J. BLUNT, M.D. JACKSON, M. PIRI & P.H. VALVATNE

1091 On the definition and derivatives of macroscale energy for the description of multiphase systems
W.G. GRAY

1105 Immiscible two-phase fluid flows in deformable porous media
W.-C. LO, G. SPOSITO & E. MAJER

1119 Explicit infiltration equations and the Lambert W-function
J.-Y. PARLANGE, D.A. BARRY & R. HAVERKAMP

1125 Numerical methods for incompressible viscous flow
H.P. LANGTANGEN, K.-A. MARDAL & R. WINTHER

1147 Computational engineering and science methodologies for modeling and simulation of subsurface applications
M.F. WHEELER & M. PESZYŃSKA

1175 Multi-scale iterative techniques and adaptive mesh refinement for flow in porous media
J.A. TRANGENSTEIN

1215 An overview of research on Eulerian–Lagrangian localized adjoint methods (ELLAM)
T.F. RUSSELL & M.A. CELIA

1233 Optimal design for problems involving flow and transport phenomena in saturated subsurface systems
A.S. MAYER, C.T. KELLEY & C.T. MILLER

1257 On the assimilation of uncertain physical knowledge bases: Bayesian and non-Bayesian techniques
G. CHRISTAKOS

1275 An integrated approach to hydrologic data assimilation: interpolation, smoothing, and filtering
D. MCLAUGHLIN

1287 Statistics of extremes in hydrology
R.W. KATZ, M.B. PARLANGE & P. NAVEAU

1305 Investigating soil moisture feedbacks on precipitation with tests of Granger causality
G.D. SALVUCCI, J.A. SALEEM & R. KAUFMANN

1313 Advances in the use of observed spatial patterns of catchment hydrological response
R.B. GRAYSON, G. BLÖSCHL, A.W. WESTERN & T.A. MCMAHON

1335 Ecohydrology of water-controlled ecosystems
A. PORPORATO, P. D'ODORICO, F. LAIO, L. RIDOLFI & I. RODRIGUEZ-ITURBE

1349 How representative are local measurements of the surface shear stress for regional values?
K. ENG & W. BRUTSAERT

1357 Quantifying net ecosystem exchange by multilevel ecophysiological and turbulent transport models
M. SIQUEIRA, G. KATUL & C.-T. LAI

1367 Remote sensing in hydrology
T.J. SCHMUGGE, W.P. KUSTAS, J.C. RITCHIE, T.J. JACKSON & A. RANGO

1387 Radar hydrology: rainfall estimation
W.F. KRAJEWSKI & J.A. SMITH

1395 Conference Diary
